

Asset Wizard

Benefits

- Extremely easy to use
- Configures itself to your system setup
- Close to zero implementation effort
- Easy to customize
- Cuts down data entry time
- Eliminates re-keying errors
- Lets you automate transaction preparation
- Correct errors quickly

Asset Wizard allows you maintain your Oracle asset transactions from Excel. Forget about manual data entry when you can now download asset information into Excel, make the necessary changes using the flexibility of Excel and then upload the changes directly into Oracle Assets. It is robust, extremely fast and flexible. Use Excel to download your Asset Information as the basis for new additions or to make changes or to simply populate asset information into Excel for analysis.

Enjoy the smoothest integration from your desktop to Oracle Assets.

Feature Overview

- Based on MS-Excel
- Forms assist with data entry validation and error correction
- Advanced download capability
- Simplifies asset maintenance by allowing:
 - Additions
 - Additions Tax
 - Adjustments
 - Capitalize CIP Assets
 - Depreciation Update
 - Reclassifications
 - Retirements
 - Reinstatements
 - Revaluations
 - Transfers

Architecture

- Compatible with Microsoft Excel 2000 and later versions
- R11i to R12
- No client install
- Uses Applications function security

Customize Fields

- Users select a data entry mode (e.g. addition, addition tax, adjustment, etc)
- The 'Set Wizard Columns' form enables you to quickly select what information to include in the worksheet for that mode.
- Mandatory columns are pre-selected, users can select other fields to also be mandatory
- Allows labels names to be changed and columns to be removed.

Set Wizard Columns

Listed below are the fields available to the wizard for upload. These fields can be made mandatory by checking the mandatory box. You can remove the field from the wizard by checking the Remove box.

Addition Tax

Column	Label	Mandatory	Remove
Upload Status		<input checked="" type="checkbox"/>	<input type="checkbox"/>
Upload Messages		<input type="checkbox"/>	<input type="checkbox"/>
Transaction ID		<input type="checkbox"/>	<input type="checkbox"/>
Asset ID		<input type="checkbox"/>	<input type="checkbox"/>
Book		<input checked="" type="checkbox"/>	<input type="checkbox"/>
Asset Number		<input checked="" type="checkbox"/>	<input type="checkbox"/>
Transaction Date		<input type="checkbox"/>	<input type="checkbox"/>
Comments		<input type="checkbox"/>	<input type="checkbox"/>
Context		<input type="checkbox"/>	<input type="checkbox"/>
Attribute1		<input type="checkbox"/>	<input type="checkbox"/>

Ok Cancel Create

Transaction Forms

- Data entry forms are available for each data entry mode (additions, additions tax, adjustments, depreciation, reclassification, retirement, reinstatement, revaluation and transfer)
- The transaction forms are available to assist with data-entry and error correction.
- The forms are optional you can key/paste information directly into the worksheet.
- Lists of Values are validated according to your configuration.

Download Assets

- The download function is very flexible and enables you to select assets using one or more of the filters.
- List of Values and Search capabilities are available for filters.
- The download will populate the spreadsheet with the relevant information for the assets.
- The asset information can be subsequently updated and loaded back into Oracle.
- The download function enables efficient maintenance of assets.

Example Worksheet

Below is an example of the Asset Wizard worksheet in 'addition' mode. This example shows assets being added.

The status columns enable the user to quickly see the progress of the records. You can see that five rows have been successfully loaded and one has been rejected. The rejected row can be quickly corrected and loaded.

Upload Status	Upload Messages	Transaction ID	Asset ID	Asset Number	Transaction Date	Comments	Description	Tag Number	Serial Number	Asset Type	Category	Asset Key	Parent Asset
