

## Excel-Out

### Benefits

- Reports are made available in Microsoft Excel format
- Transform custom SQL queries into reports opened directly in Excel
- Use the power and flexibility of Excel to improve presentation of reports
- Close to zero implementation effort
- Virtually eliminates report deployment time
- Reduces the need for Oracle report development
- Standard Oracle & Excel interface, no learning curve
- No client software needed
- Also ideal for hosted environments

### Feature Overview

- Utilizes standard Oracle Concurrent Manager to produce Excel outputs
- Create new reports by copying old ones and replacing the query
- Excel output eliminates restrictions on number of columns imposed by paper width

*Excel-Out enables you to run reports and output them directly to Excel. Using the power and flexibility of Microsoft Excel reports can then be presented in a meaningful way.*

*Excel-Out creates reports on-demand providing management the critical information when it is needed.*

*Are your reports confusing and hard to read? Does it take weeks and a fortune to get a new report or to modify an existing report? It is time for Excel Out!*

Excel-Out reports run on the concurrent manager (the same as any Oracle report). They simply contain a SQL query and parameters, as required. When the report is run, the output can be viewed directly in Microsoft Excel, this file can be saved and information presented.

### Architecture

- Any version of Microsoft Excel, including Excel 2000 and later versions.
- Any version of Oracle Applications from Release 10.7 NCA through to Release 12 of Oracle E-Business Suite.

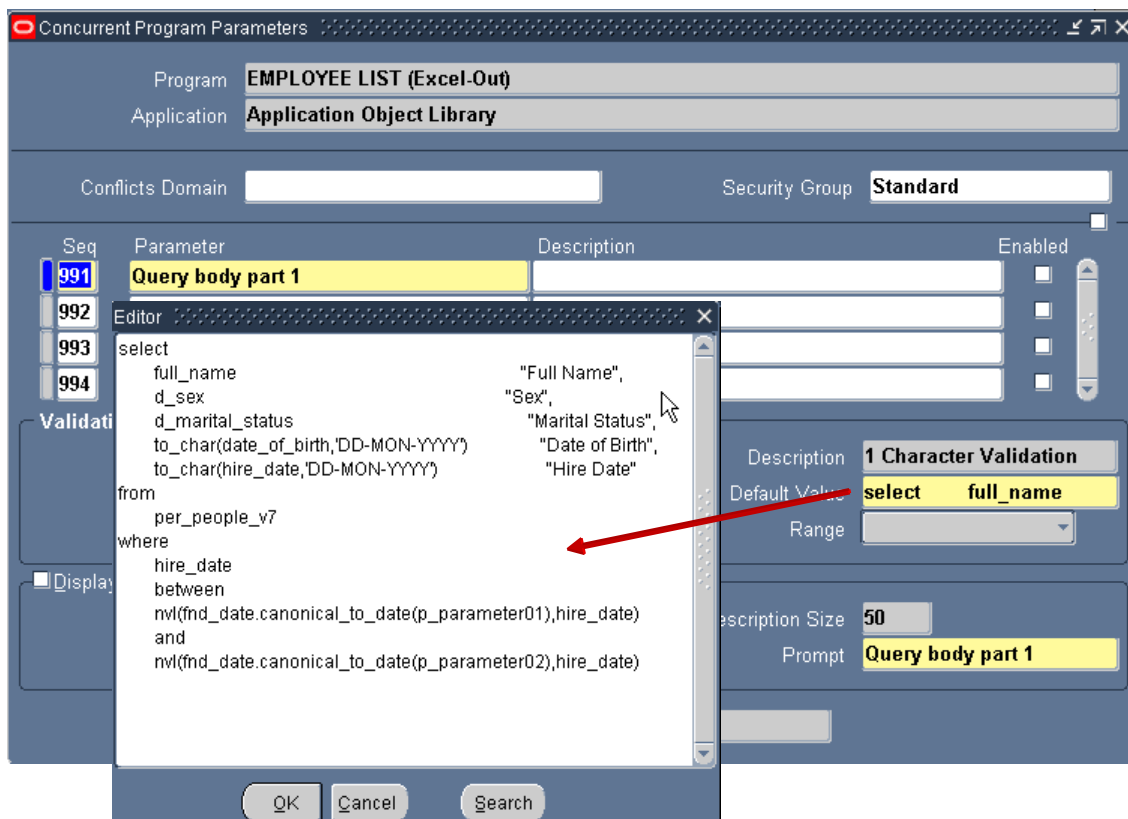

## Create Your Own Report in Seconds

An Excel-Out concurrent program will be created during installation. Copy the Excel-Out program and give it a new name. Save.

## Enter the Report Query

Enter the query into the default value field (Seq# 991). Include the report parameters in the query (e.g. p\_parameter01 displayed below).

## Define the Parameters

Define the parameter(s) that you need and enter the Value Set and Prompt.

Concurrent Program Parameters

Program: EMPLOYEE LIST (Excel-Out)  
Application: Application Object Library
